

Energy and Emission Policy

Adani Ports and Special Economic Zone Limited (APSEZ) considers energy and climate change as an important parameter for its business and recognises the global action of sustainable energy consumption and resource conservation to reduce the greenhouse gas emissions.

- In addition to the Environmental Policy, APSEZ, its subsidiaries and joint ventures shall endeavor to:
- Maintain legal compliance of energy and emission related applicable laws and regulations through progressive management plan.
- Identify and evaluate the risk associated with energy and emission related activities and formulate mitigation strategies.
- Set objectives, targets and processes to reduce energy and carbon footprint by implementing energy conservation activities in continuous manner by adopting energy efficient technologies.
- Promote usage of renewable, green and clean energy sources.
- Encourage green procurement and innovations to adopt sustainable and energy efficient technologies for low carbon development.
- Educate stakeholders to encourage efficient use of energy resources; and
- Measure, monitor and review the energy and emission performance of an organization in accordance with this policy at regular intervals and audit (internal/ external) it before communicating to relevant stakeholders.
