PART - F

Please specify the characterization (in terms of Composition and quantum) of Hazardous as well as solid wastes and indicate disposal practice adopted for both these categories of wastes:

- Used oil is being sent to authorized recyclers and reusing for the lubrication purpose in stitching machine and railway siding.
- Oily cotton waste is being sent to common hazardous waste incineration facility (SEPPL) for the incineration process.
- Unit has developed MRF (Material recovery Facility) for Waste segregation as per 5R (Reduce, Reuse, Recycle, Recover & Reprocess) principles of waste management. Segregated recyclable materials are sent to respective recycling units, whereas remaining non-recyclable waste is bailed and sent to cement plants for co-processing as RDF (Refused Derived Fuel).
- Agreement with cement unit i.e., Ambuja cement Ltd. for co-processing of Hazardous and non-hazardous waste.
- Food waste is purely converted into manure used as manure by the horticulture department.
- Sludge generated from STP is also used as manure by the horticulture department.

PART - G

Impact of the pollution abatement measures taken on conservation of natural resources and on the cost of production.

- Unit has installed Sewage Treatment Plant and for treatment of the Sewage water being generated at site.
- AKBTPL has planted mangroves in 250 ha area near Sat Saida Bet (Kandla), Kutch Sea coast. Unit has formed dedicated Horticulture department & developing green belt within port premises. So far, we have developed 16.09 Ha green belts within port premises and the same is being well maintained.
- AKBTPL has taken significant step towards energy reduction program Reduced the idle running of Material handling system through PLC interlocking System stop in auto mode if idle up to 30 min's and controlling the speed of high-speed conveyors (KC 2A/2C) with respect to load.
- The total cost incurred on environmental protection measures is enclosed as **Annexure-2** and the green belt developed so far enclosed as **Annexure-3**.

PART - H

Additional measures /investment/ proposal for environmental protection including abatement of pollution, prevention of pollution.

- Unit is doing Regular Environmental Monitoring of Port & surrounding area through reputed NABL certified Laboratory. All the required environmental parameters are well within specified limits & the details are being submitted regularly to GPCB, CPCB, MOEF & concerned authorities.
- Unit has installed STP for treatment of the Sewage water being generated at site. The unit has also provided dump pond & conveyance channel for collection of runoffs generated from Coal Yard.
- Unit has installed OWC (organic waste converter) machine for treatment of daily food waste generated at site. Composting manure is being used by the horticulture department as an organic fertilizer.
- Unit has provided FFS & DSS at coal yard & conveyer system and carrying out regular water sprinkling to control the dust exposure.
- The unit has deployed three road sweeping machines to control the fugitive dust emissions.
- Unit is developing green belt within port and outside continually with help of Horticulture dept. Additional area covered under green belt during FY 2022-23: 0.20 Ha.
- Continually taking new initiatives for protection of environment with respect to air-water-soil.
- Unit has hired 3 nos. Bouser for dust suppression ongoing sprinkling activity.
- Developed the entire unpaved area of Weighbridge complex and Fall Protection System (FPS) area. Also developed the road to the Pump-house.
